

# Reed-Solomon decoder IP core

Factorial Consulting Ltd.

Licensing information

The Reed-Solomon decoder IP core is a stand-alone Java application for generating the VHDL source code of Reed-Solomon decoder cores. It is available for licensing under the following terms and conditions.

## General terms

- The core generator application (hereinafter the “Application”) is available for licensing to individuals or for-profit, non-profit or governmental organisations. “Licensee” hereinafter refers to either the individual or the organisation that has purchased a license to use the product.
- There is no expiration date for a license. Purchased licenses are valid forever. It is expressly forbidden to sell or give away the purchased license.
- By purchasing a license, Licensee acquires the right to use the product. It is understood that all Intellectual Property (IP) rights embodied within the product remain in the sole possession of our company.
- Licensee may use the Application for generating an unlimited amount of Reed-Solomon decoder cores (in the form of VHDL source code, hereinafter the “Code”).
- If Licensee is an organisation consisting of multiple persons, only one person may use the Application at any given time.
- The Code is usable for Licensee’s own purposes, or in Licensee’s products without restriction. There are no royalties or per-product licensing fees associated with incorporating the Code in Licensee’s commercial or non-commercial products. Nor is there any restriction on the intent or purpose of the products that the Code may be used in.
- Permission is granted to Licensee to inspect and manually modify the Code. It is expressly forbidden to reverse-engineer or otherwise inspect the Application itself.
- Permission is granted to make backup copies of the Application or the Code on any storage media, backup system, or revision control system that is within the sole control of Licensee.
- It is expressly forbidden to disclose the Application, or any of the Code to a third party, including, but not limited to publishing, selling, giving away, or storing on publicly available servers.

## Limited remedy and disclaimer

We represent that the Application and the generated Code will substantially conform to the relevant, published specifications. Our sole liability and Licensee’s exclusive remedy with respect to breach of the foregoing limited representation is limited to error correction or replacement, or if neither is in our opinion commercially feasible, termination of the license and refund of the fee received from Licensee.

## Critical applications

The licensed Application and the generated Code is not designed to be fail-safe and is therefore not warranted for use as the principal mechanism in life-support applications, devices, systems or other applications that invoke potential risks of death, personal injury, or severe property or environmental damage. Use of the Application or the generated Code in such critical applications is understood to be fully at Licensee’s own risk.

## Pricing

- Licenses are available for a fixed price of 2500 EUR (+VAT). Purchasing a license entitles Licensee to a 33% discount when upgrading the product within one year of purchasing the original license. Purchasing an upgraded product restarts the one-year period.
- Engineering support and consulting concerning Licensee’s use of the Application or Code is available for an hourly rate of 100 EUR (+VAT).
- Further development, implementation of new features or tailoring the Application to specific needs is possible, and is subject to custom agreements.

## Product versions

We may develop new versions of the product in the hope of improving and enhancing it. New versions of the product may or may not be compatible with the present version. We accept no liabilities with respect to incompatibilities between present and future versions of the product. In the process of product development, published specifications may be changed without prior notice. However, versioning information and information about new versions will be available free of charge to Licensee for evaluation.
